SUMMARY

AI Engineer specializing in LLMs, RAG pipelines, and Generative AI — experienced in prompt engineering, production API deployment, and building agentic systems using LangChain and FastAPI. Proficient in model fine-tuning, computer vision, and end-to-end ML pipeline development with Python, TensorFlow, and PyTorch. Passionate about bridging complex machine learning models with seamless, production-ready applications.

EDUCATION

Karunya Institute of Technology and Sciences

Coimbatore, India

B.Tech in Artificial Intelligence and Data Science

Aug 2023 – May 2027 (Expected) | CGPA: 8.05 / 10

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL

AI/ML Frameworks: TensorFlow, PyTorch, Scikit-learn, LangChain, LangGraph, CrewAI, Hugging Face, OpenCV

LLM & Generative AI: RAG Pipelines, Prompt Engineering, Model Fine-Tuning, Agentic AI, Multimodal AI

Backend Development: FastAPI, Node.js, Express, Flask, REST APIs, MongoDB, MySQL, Firebase

Frontend Development: React, Tailwind CSS, HTML, CSS, Vite

Data Science & Visualization: Pandas, NumPy, Power BI, Streamlit, Jupyter Notebook

DevOps & Tools: Docker, Git, GitHub, Linux, Postman

EXPERIENCE

Edify Techno Solutions

Chennai, India

AI & Data Science Intern

Jun 2025

- Built end-to-end ML pipelines in Python: performed EDA, feature engineering, and model training with cross-validation.
- Deployed ML models as production web applications using FastAPI and Streamlit for real-time LLM and model inference.
- Created Power BI dashboards translating model outputs and analytical insights into actionable business KPIs for stakeholders.

PROJECTS

AIRA – Adaptive Insights and Reliable Actions

Multimodal AI Agent / Agentic AI

- Engineered multimodal AI agent with 4 LLM models, reducing strategic research time by 60%.
- Optimized inference latency by 35% using async FastAPI endpoints for real-time insights.
- Built RAG pipeline processing 10,000+ data points for Finance, Risk, and Market analytics.
- Tech Stack: Python, FastAPI, LangChain, Multimodal AI, RAG, REST APIs*

Early Plant Disease Prediction via Airborne Spore Detection

Computer Vision / AI

- Fine-tuned YOLOv8 achieving 92% accuracy with 5-day early outbreak prediction.
- Processed 10,000+ images using OpenCV, reducing manual analysis time by 80%.
- Developed automated disease-forecasting system with real-time microscopic spore detection.
- Tech Stack: Python, YOLOv8, OpenCV, TensorFlow, Computer Vision*

ArtisanConnect – AI-Powered Artisan Marketplace

Full-Stack / Generative AI

- Built e-commerce platform for 500+ users with Google Gemini AI content generation.
- Reduced content creation time by 70% via prompt-engineered automation pipelines.
- Engineered Firebase/Cloudinary pipelines achieving 99.9% uptime with sub-200ms loads.
- Tech Stack: React, Node.js, Firebase, Google Gemini AI, Cloudinary, Tailwind CSS*

Fake News Detection System

Machine Learning / NLP

- Designed NLP pipeline using TF-IDF achieving 89% accuracy on 20,000+ articles.
- Deployed Flask app with under 50ms inference for real-time production classification.
- Optimized feature extraction pipeline for scalable, production-ready deployment.
- Tech Stack: Python, NLP, TF-IDF, Scikit-learn, Flask, Pandas*

CERTIFICATIONS

Azure AI Fundamentals (Microsoft, 2026)

Building RAG Applications (MongoDB, 2025)

Building AI-Powered Search with Vector Search (MongoDB, 2025)

Power BI Visualization (Infosys, 2025)

Exploratory Data Analysis (Infosys, 2024)

Data Fundamentals (IBM SkillsBuild, 2024)
